

AUTOVIDREIRA

Company Presentation 2022

01

TIMELINE

Know the principal steps that tell the story of the last 70 years.

02

COMMITMENTS

The major principles and core values that define the company that we are

03

PRODUCTS AND SERVICES

Large set of products, provided by specialized *staff*.

04

WHERE WE ARE

Information to contact us and locations where to visit us.

01 Timeline

Transforming glass since 1949.
With more than 70 years of history, we are a
reference company in our sector.
Our commitment is to exceed
customer's expectations.

1949

AUTOVIDREIRA IS BORN

Despite installing glasses in the civil construction sector, our core business was the windshield and back and side windows for cars.

1999

CHANGING THE MANAGEMENT

We elected a young team, redirected the focus of our business and invested in the diversification of our services in order to reach a greater number of people and entities.

2002

OPENING OF CAMPO DE OURIQUE STORE

Corresponding with greater proximity to our customer's needs, in addition to all glazier services, we started to offer all types of framing works.

2004

OPENING OF SÃO BENTO STORE

Feeling that our costumers deserved another space with similar offers, we opened the second store in Rua do Poço dos Negros, São Bento.

2008

PRODUCTION UNIT AT SACAVÉM

We estabilished our production unit at Sacavém. More than 300m² of the best available technology that help us to reach our daily goals.

2018

NEW LOCATION AT CAMPO DE OURIQUE

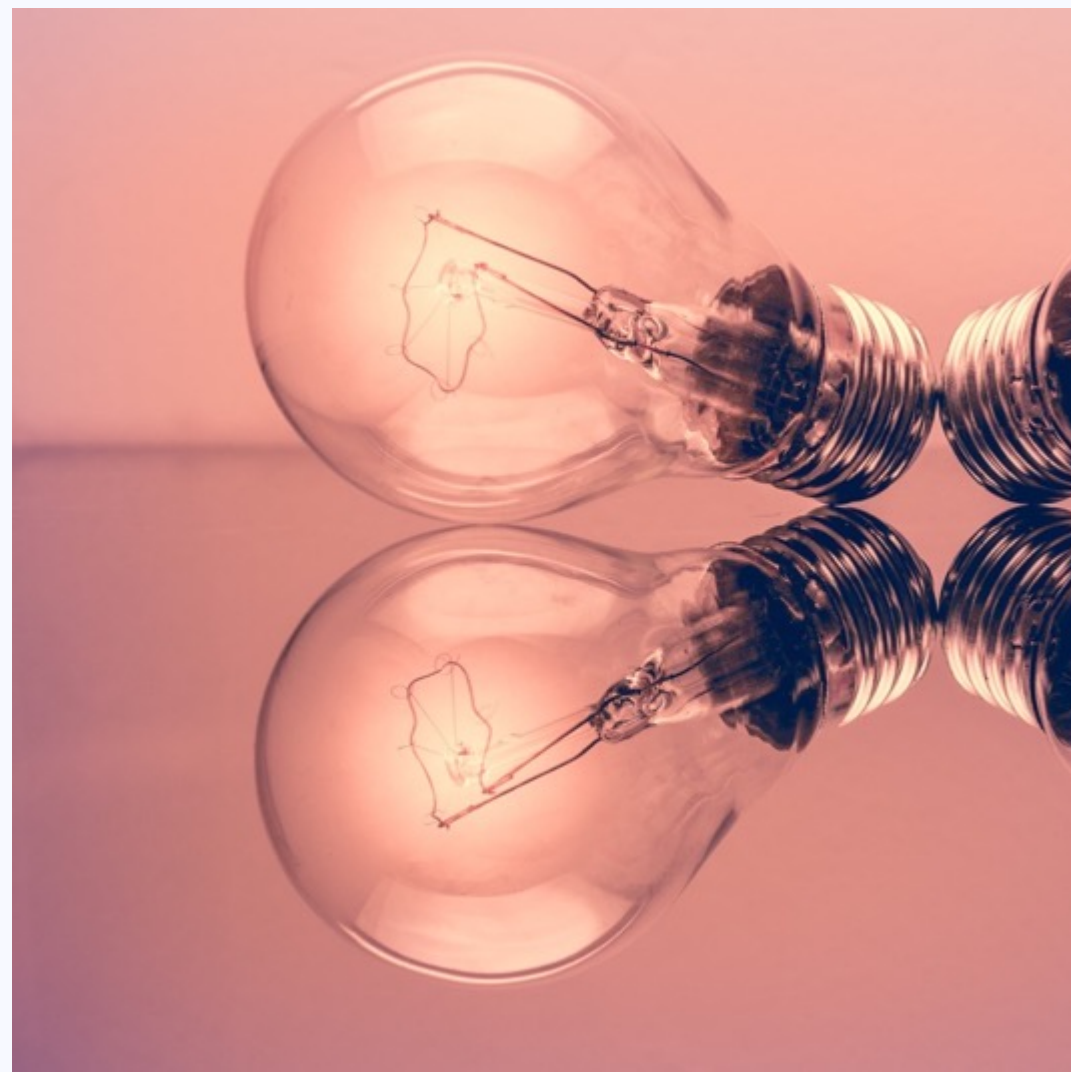

We change our Campo de Ourique store, to a priviliged location – in the center of the neighborhood – that alllowed us to take another step forward on our journey.

02

Commitments

Show the company that we are and the major principals on which we believe.

INNOVATION

In the search for ambitious goals and new paths, to consolidate processes and provide a better offer.

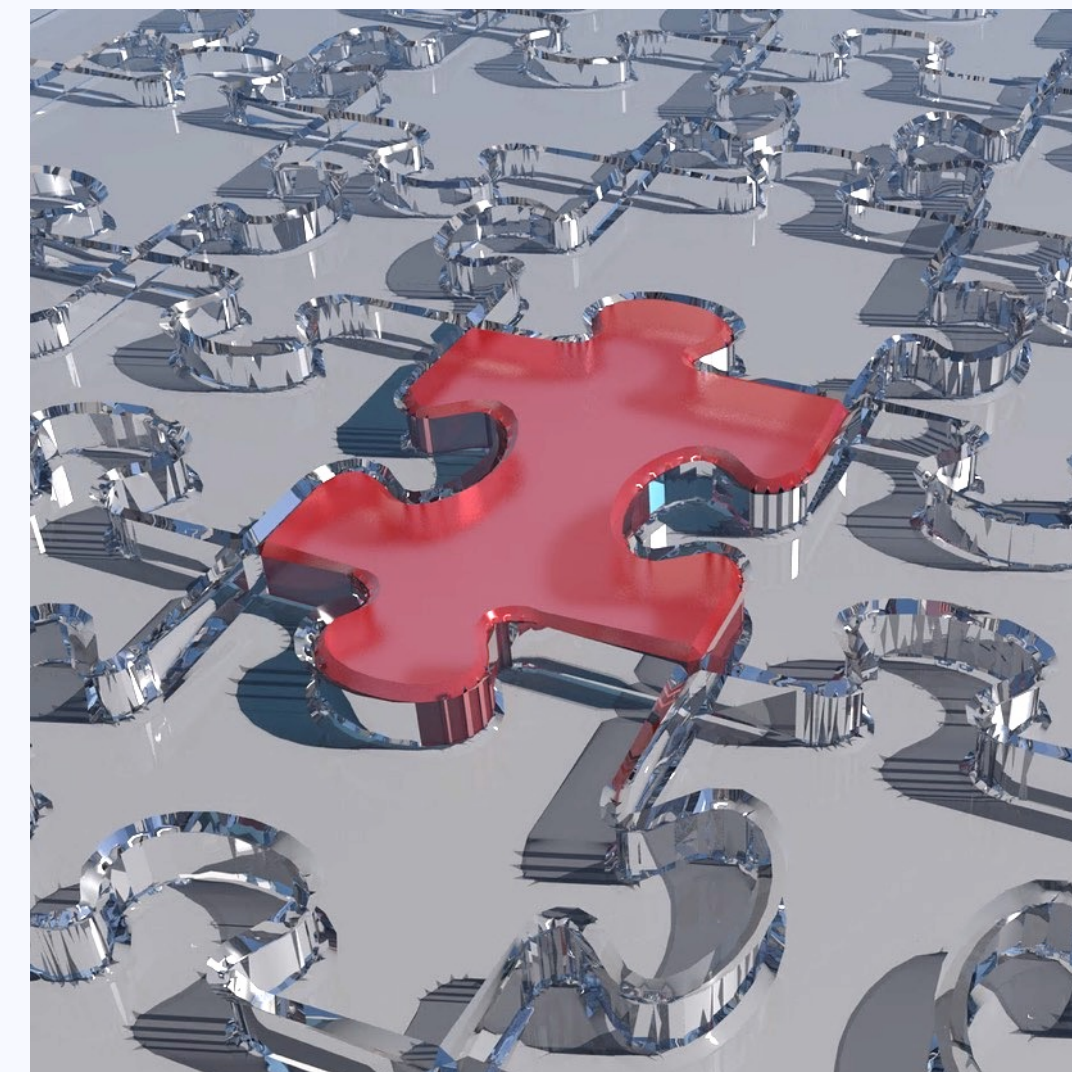

TRANSPARENCY

In relationships with customers, partners, suppliers and between employees.

COSTUMER-CENTRICITY

To deliver outstanding results, we develop close and trustworthy relationships.

PERSONALIZATION

By presenting the ultimate privilege of having 100% tailor-made solutions.

03

Products and Services

Glasses. Mirrors. Wood Frames.

Products. Top quality. Solutions for everyone.

GLASSES

To security, usefull or design solutions

MIRRORS

To architectural and decoration projects

—
**The right solution
Tailor-made for you.**

WOOD FRAMES

To eternize memories or
preserve art works

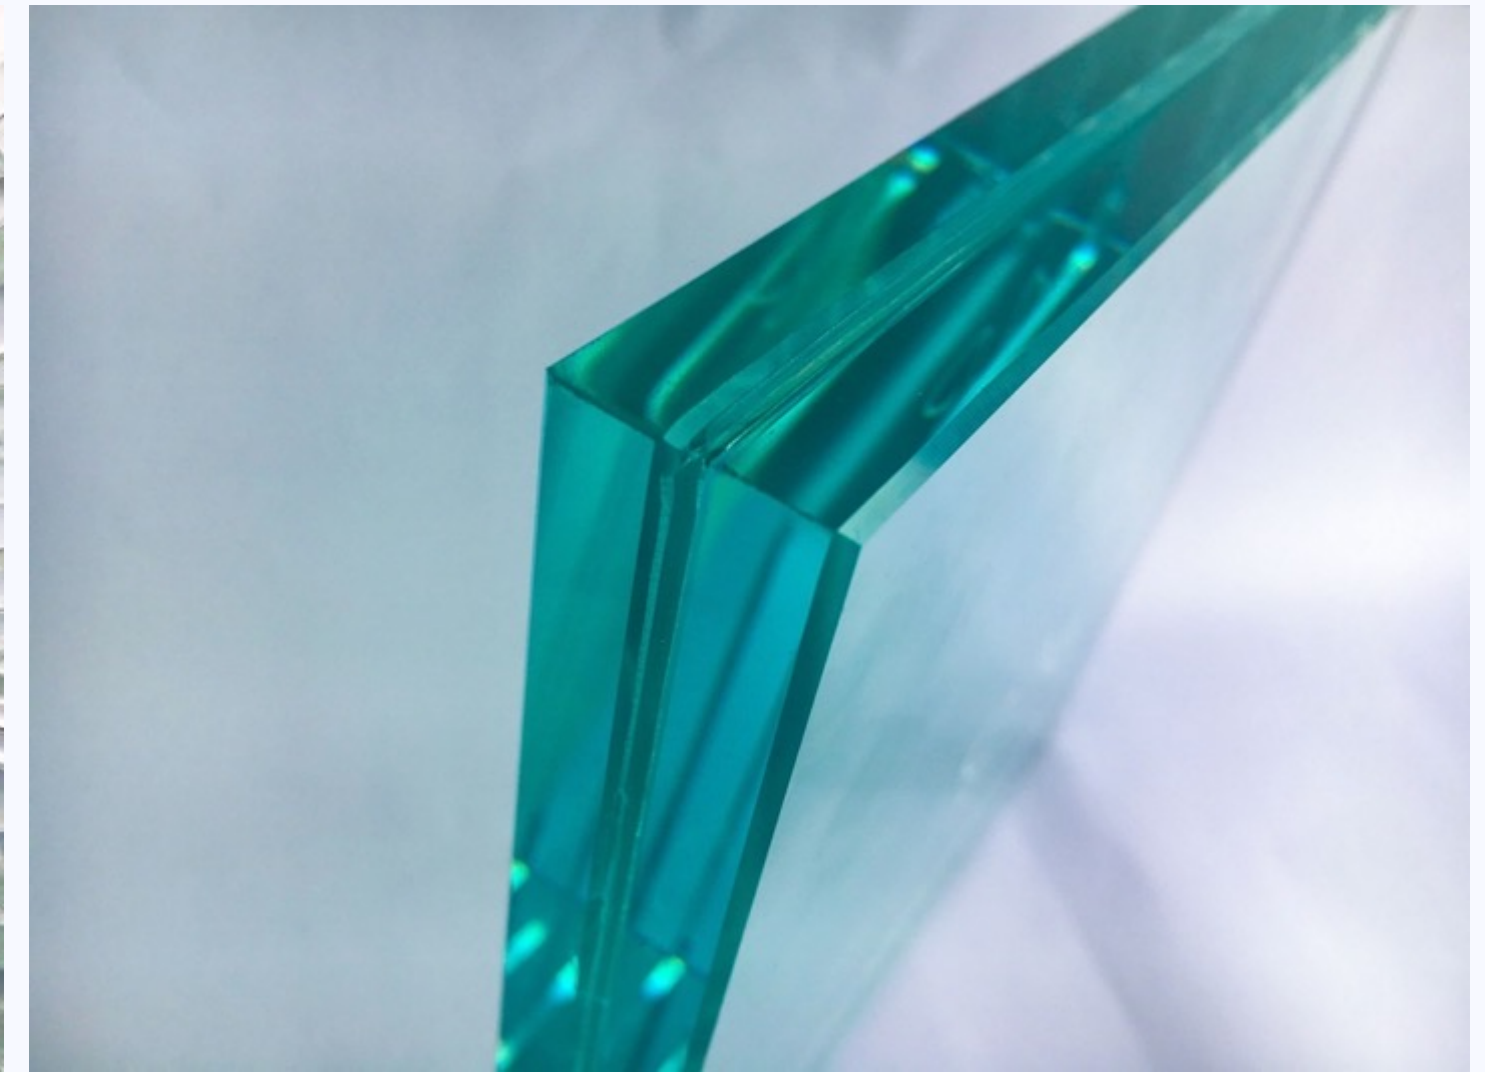

FLOAT

It can be colorless, frosted, colored (bronze/green/gray) or patterned, with different thicknesses. It can be cutted or manufactured according to the requisits and specifications.

TEMPERED

It's a safety glass, that is submitted to a heat treatment and subsequent sudden cooling. When it breaks, it shatters into small fragments, reducing the risk of major accidents.

LAMINATED

It's composed of two or more glass sheets joined to one or more layers of vynil film. If it breaks, the fragments remain attached to the vynil film, reducing the risk of accident and injuries.

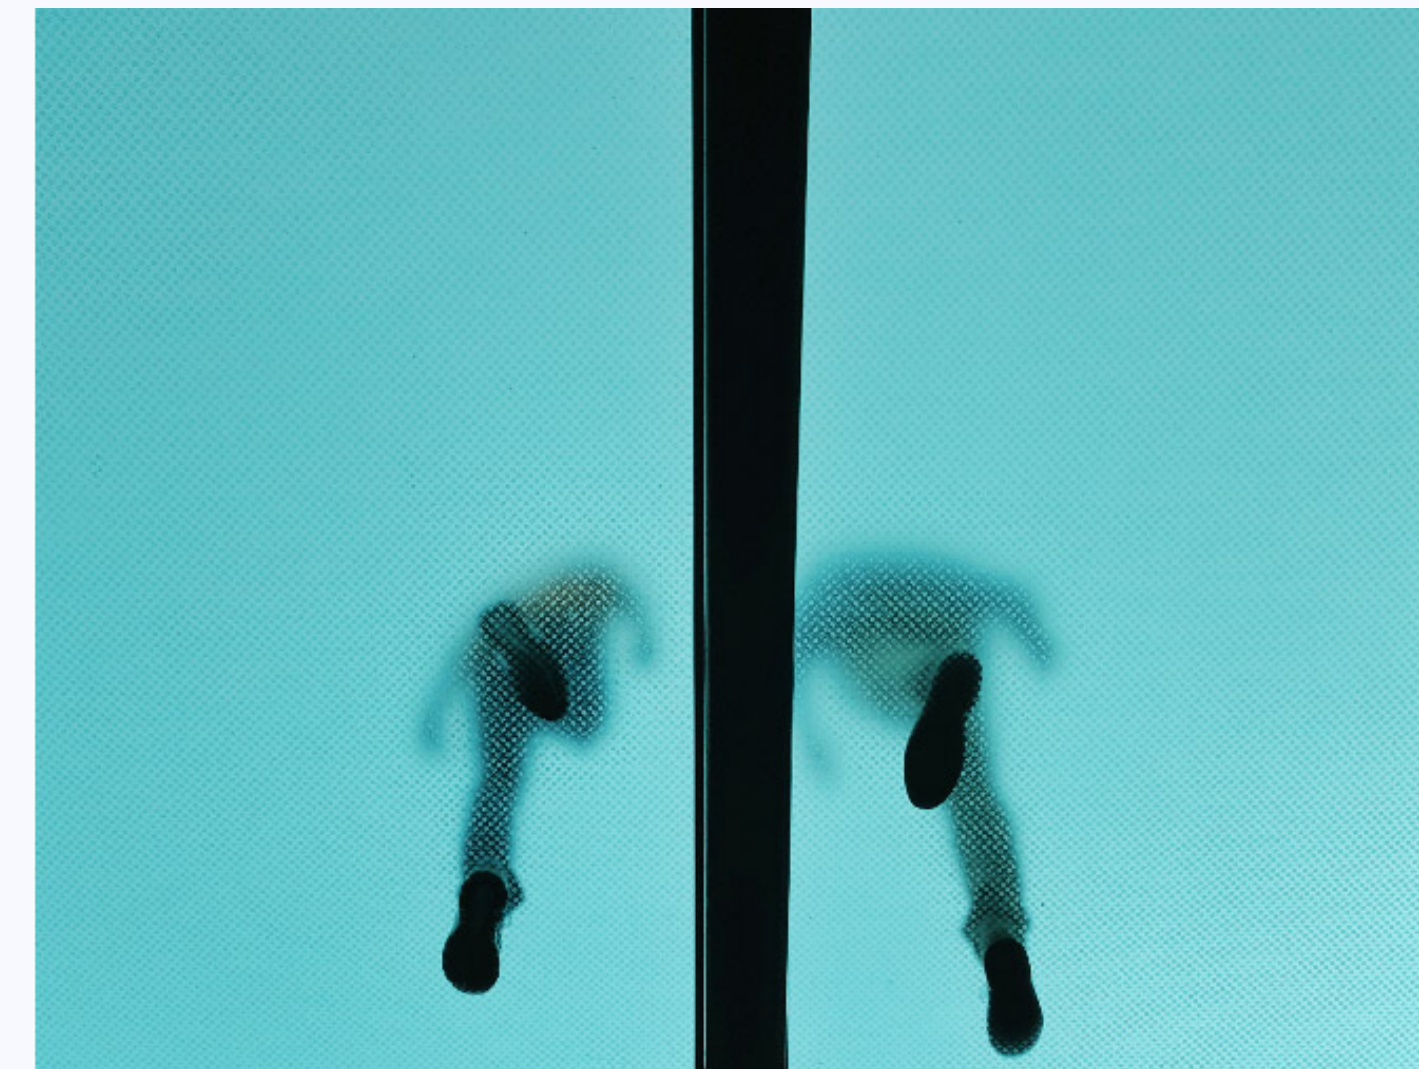

LACQUERED

Resistant to UV rays and discoloration, as well as moisture, could be used in kitchens and bathrooms. It's unique for architectural projects, combining modernity and flexibility due to the range of colors.

DOUBLE/TRIPLE

It's composed by 2 or more glass sheets and a spacer – with air or gas sealed. This technology could be tailored to improve sunlight control, thermal and acoustic insulation or specific safety conditions.

STRUCTURAL FLOOR

It's composed by a structural glass and a stepped glass – which acts as a wear layer. This laminated tempered glass gives the maximum security and resistance.

REFLECTIVE

It's a float glass to which a metallic transparent layer is applied, that allows the control of sunlight incidence. The transfer of energy from outside is limited, improving thermal and visual comfort.

PRIVACY

Is a laminated glass with controlled opacity, through an electrical mechanism. At the press of a button, the glass switches between clear and frosted glass, as desired.

ANTI-BACTERIAL

The antimicrobial ability is provided by silver ions inside the glass and eliminates 99% of all bacteria that is formed on its surface. That interaction, destroy the bacteria metabolism.

MIRRORS

Silver | Grey
Bronze | Antique

It's a float glass (that can be colorless or colored) to which is applied several silver layers - the mirroring process. Taking into account the resistance and reliability of this material, several manufacturing techniques could be applied, namely: edges, bevels, holes, laminating and matting.

FRAMES

Photo-frames

Passepartouts

Cardboards

More than 300 references of wood, aluminium and MDF sheets frames. FSC® certified wood models and portuguese production models. Cardboards and passepartouts *acid-free*. Normal, non-reflective or museum glass – and plexiglass. Photo-frames and artworks.

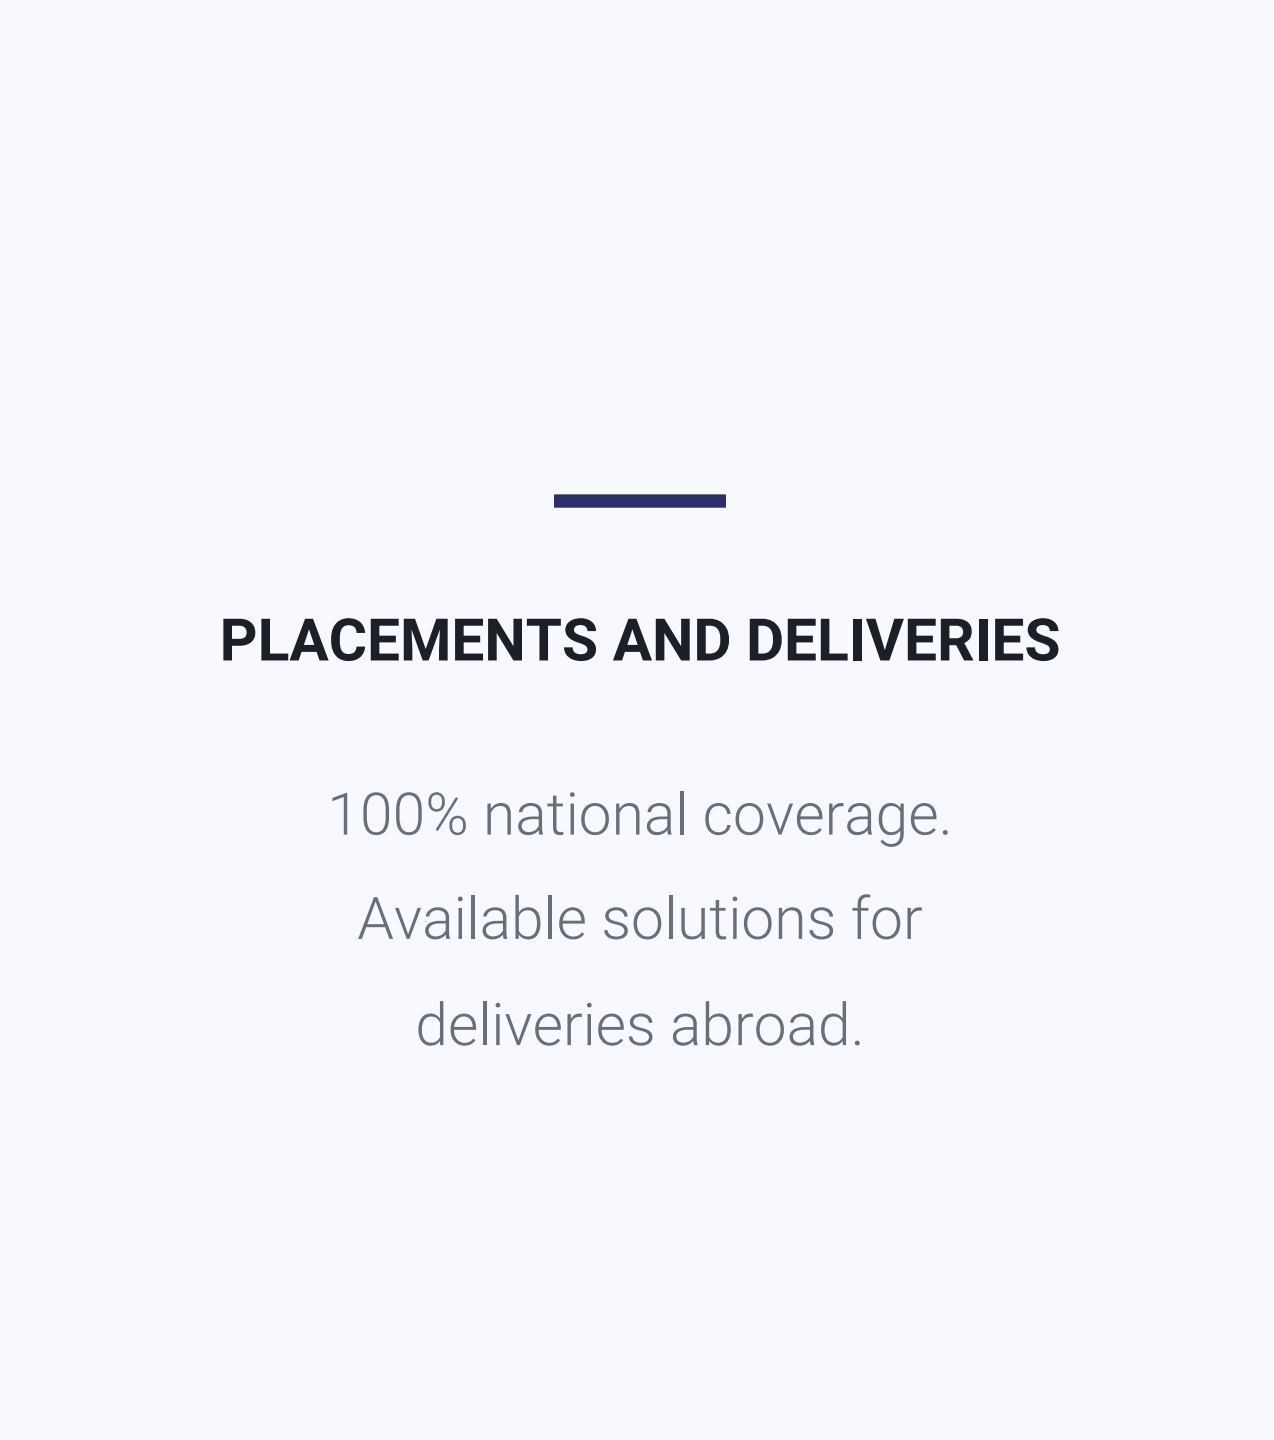

FREE QUOTES

To any situation, we estimate the best option and the most advantageous offer.

HOME INSTALLATIONS

Schedule a visit of our specialized staff. Technical support and on-site fittings.

PLACEMENTS AND DELIVERIES

100% national coverage.
Available solutions for deliveries abroad.

MANUFACTURE

Edges, bevels, holes, notches, tempering, laminating, matting, UV bonding.
